

A hackathon is an event organised to bring together people and entities for the development of innovative solutions for the existing challenges in specified area through problem statements. The problem statements are worked upon by the participants who include, but not limited to, individuals, teams, entities from the hardware/software and coding community during the limited time-period of the hackathon. The modus operandi of a hackathon is a competitive event where the participants submit ideas, create solutions, exhibit the prototypes, and the solutions are judged by a panel to arrive at the winner/s of the hackathon. The solutions thus achieved are primarily technology driven innovative solutions which can be used or promoted by the organisers to refine the existing processes.
